## **DETAILED ACTION**

### **Status of the Application**

Receipt of the request for extension of time, the Applicant's Response/Arguments and the Amendment, all filed 02/26/04 is acknowledged.

Claims 1-7 and 12-16 are pending. Claims 1, 12 and 13 have been amended. New claims 14-16 have been added. Claim 8 has currently been cancelled. Claims 9-11 were previously cancelled.

### ***Allowable Subject Matter***

Claims 1-7 and 12-16 are allowed.

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the prior art fails to disclose nor fairly suggest a process of making and composition formed thereof wherein the composition consists essentially of a mixture of hydroxypropylcellulose polymer and a pharmaceutically active compound whereby the hydroxycellulose polymer has a molecular weight of between 250,000 and 1,200,000 and a molar degree of substitution of greater than or equal to 3 and is 40-95% of the mixture in combination with the presence of small particles having a maximum diameter of between 0.2 and 3.0 mm wherein the composition is provided in an agitation independent, multi-unit sustained release dosage form.

Art Unit: 1615

The closest prior art (Schor US Pat. No. 4,226,849) does not recognize the criticality of the molecular weight, particle size and degree of substitution. The instantly claimed product further permits control of the plasma concentration over a relatively long period of time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
